Message from the Guest Editor

Dear Colleagues,

In recent years, the food industry has had a clear need for simple, rapid, and cost-effective techniques for objectively evaluating the quality and composition of the foods that we produce and consume. Several methods and techniques, such as spectroscopy (e.g., near- and mid-infrared), biosensors, and electronic noses and tongues have been used to monitor and assess the bioprocesses and fermentation of several foods, such as meat, wine, and other agricultural products. This Special Issue invites researchers and industry to submit short communications, reviews or full research papers addressing novel applications related to bioprocessing and monitoring fermentation.

Message from the Editor-in-Chief

Welcome to a new open access journal, Fermentation, which meets the growing need for a high quality peerreviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this new journal and look forward to working with you to make Fermentation a leader in its field. Your contributions are vital for the success of this new journal. Proposals for editing a special issue for a particular topical area are always welcome.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biotechnology & Applied Microbiology*) / CiteScore - Q2 (*Plant Science*)
