Message from the Guest Editors

Dear Colleagues,

The Incarlopsa-UCLM Open Innovation Chair has been created to promote research and transfer activities, so as to boost scientific training and diffusion as well.

From a wide perspective within this Project framework, this Special Issue of *Foods* has dealt with open innovation research and techniques in meat industry and meat products. For this purpose, this Chair has always considered two main aspects—these being: First, the nutritional and healthy property enhancement of fresh meat and ham. Second, new products and marketing strategies, as well as new formats and research opportunities, that are being implemented throughout different business activities.

Therefore, we are pleased to invite our colleagues, all researchers and faculty members to contribute papers to this relevant publication on open innovation in the meat industry and throughout all different meat products.
