Deadline for manuscript  
submissions:

**closed (20 October 2020)**

### Message from the Guest Editor

Decreasing greenhouse gas emissions and increasing sequestration from forests is receiving political and societal attention. At the same time, decreasing land-use emissions can be a highly visible means to impact net greenhouse gas numbers while benefiting lives, livelihoods, and the broader natural capital positives across supply chains, regions, and countries. The Reducing Emissions from Deforestation and Degradation program is a global effort for accounting and promoting payment for positive forest impacts. Over the last ten years, REDD+ has been subject to investment to build capacity and for initial piloting. Now represents a significant junction point where practitioners can step back and see the outcomes of piloting. The sector can take stock of challenges and solutions in accounting greenhouse gases from forests, in creating emission reduction strategies and safeguard systems, and achieving emission reductions in private sector supply chains and in integrating private sector contributions into national REDD+ reporting. This Special Issue welcomes studies spanning all aspects of the actual and potential successes and failures of REDD+.

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
