Message from the Guest Editors

Comprehensive information and up-to-date knowledge on the waterlogged archaeological woods (WAWs) under degradation by biotic and abiotic agents is crucial for developing the appropriate strategies of conservation and for exploring the significance of human cultural context embedded in WAWs. A wide range of rapidly advancing analytical methods, such next-generation sequencing for identification of microbiota, have been employed to elucidate the characteristics of WAWs. However, nearly all information available to date is still too scattered and fragmentary to provide a coherent account of the different perspective in WAWs. In this regard, compendium in this special issue has to design to addressing a holistic coverage of relevant information across diverse disciplines. Priorities are given to novel and interdisciplinary challenges for shaping WAWs as one of the most precious cultural artifacts.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
