submissions:

5 October 2024

Message from the Guest Editors

Dear Colleagues,

The healthcare sector is particularly demanding, and healthcare professionals are often faced with significant challenges. The effects of stress and bullying affect both healthcare professionals and the quality of care. It therefore becomes imperative to implement measures to best manage both the factors that increase employee stress and the phenomenon of bullying.

This Special Issue aims to highlight best practices that can assist both healthcare organizational leaders and healthcare professionals with the best possible coping strategies of stressors at work. In this Special Issue, original research articles, systematic reviews and meta-analyses are welcome. Research areas may include (but are not limited to) the following:

- Workplace bullying;
- Work environment;
- Coping strategies;
- Job stress;
- Organizational support;
- Healthcare professionals' training;
- Resilience;
- Job burnout;
- Quiet quitting;
- Workplace violence;
- Turnover intention.
