Message from the Guest Editors

With the changes in environmental conditions, the increasing number of resistant phytopathogens to traditional treatments, and the growing demand for fruit and vegetables, there is a need to develop new and efficient methods for postharvest disease control.

This Special Issue welcomes original and review articles in (but not limited to) the following areas:

- Emerging phytopathogens and strategies for their control;
- Novel approaches for detecting phytopathogens;
- Novel methods to control postharvest diseases;
- Biological control approaches for postharvest disease management;
- The mechanism employed by these novel methods;
- Design of bioformulations for the treatment of postharvest diseases;
- Scaling-up of methods developed at a laboratory scale;
- Strategies for biological agent application to fruits and vegetables.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Luigi De Bellis

Department of Biological and Environmental Sciences and Technologies, Università del Salento, Centro Ecotekne, Via Provinciale Lecce Monteroni, 73100 Lecce, Italy

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (*Horticulture*) / CiteScore - Q2 (*Horticulture*)
