Message from the Guest Editor

Dear Colleagues,

Food safety and quality is currently a global concern, as is its impact on human health. There is a great deal of research being conducted on this topic worldwide, although, at present, new studies on food safety and quality are increasingly being conducted using new equipment and methodologies. Despite this evidence, studies relating food safety to human health are scarce. Foodborne diseases can originate at any stage of food production, such as food production in the farm areas (fruits, vegetables, seeds) or production in food factories, storage, transportation, selling spots or even in the final consumers' homes. Considering this reality, we invite our colleagues to submit research or review manuscripts targeting food quality and food safety and its impact on human health.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
