Deadline for manuscript
submissions:

15 November 2024

Message from the Guest Editor

Maternal health is critical to the health and well-being of the gestational parent, children, families, and communities. Despite important progress made over recent decades, pervasive inequalities that affect health outcomes remain, with minoritized populations being disproportionately affected. Addressing inequalities in sexual and reproductive health and rights, and gender is fundamental to safeguarding maternal health.

This Special Issue will focus on the current psychosocial, cultural, environmental, the structural factors that influence maternal health and the innovative strategies to prevent and address multiple factors affecting maternal health across the globe. Articles that focus on the prevention or the management of prevalent women's reproductive and sexual health, reproductive health care, and reproductive rights and mental health across the globe are welcomed.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
