Statistics and Quantitative
Methods, University of Milano-
Bicocca, 20126 Milan, Italy

Deadline for manuscript
submissions:

closed (31 March 2020)

Message from the Guest Editors

This Special Issue of the International Journal of Environmental Research and Public Health (IJERPH) focuses on the current state of knowledge on perinatal and postnatal exposures and adverse pregnancy, maternal, fetal and neonatal outcomes through record-linkage, population-based birth cohort study designs. Papers of a high academic standard addressing these topics are invited for submission to this Special Issue.

Possible topics for this Special Issue include:

1. Pharmacoepidemiology in pregnancy and childhood and the epidemiology of pregnancy and related neonatal complications;
2. Maternal social disadvantage and birth outcomes;
3. Exposure to prenatal environmental risk factors (i.e. air pollution, chemicals, etc.) on perinatal and childhood outcomes;
4. Safety and effectiveness of prescription medications in pregnant women and their offspring.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
