Message from the Guest Editor

While cancer incidence, mortality, and screening rates have improved over time, these improvements have not been experienced equally by all populations. In the United States, racial and ethnic minority populations living in rural areas, have a greater cancer burden than their urban and White counterparts and often have less access to cancer prevention and treatment services. Rural, racial/ethnic minority populations in countries throughout the world experience similar disparities. For this Special Issue of the International Journal of Environmental Research and Public Health, we invite research papers, reviews, case reports, methodological papers, brief reports, and commentaries that examine the dynamic of race/ethnicity and rural geography in disparities all along the cancer control continuum. Papers can be submitted from a wide range of disciplines including epidemiology, health services research, health policy, medical geography, health promotion and behaviour, and sociology. Research papers that employ quantitative and qualitative observational methods as well as intervention studies are welcome. International submissions are encouraged.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
