submissions:
closed (30 April 2022)

Message from the Guest Editors

Dear Colleagues,

For this Special Issue, we invite researchers to submit high-quality original papers or systematic reviews focusing on the practical aspects of the management of autoinflammatory and autoimmune dermatological diseases.

Skin diseases are chronic, affecting many aspects of a patient's life, resulting in a significant reduction in the quality of life and even depression. New therapeutic options are sought, because standard treatment often does not meet the expectations of the doctor and the patient. Here, we present new therapeutic treatment options.

This Special Issue focuses on new therapeutic options for treatment and other possibilities of well-known medications.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
