Message from the Guest Editors

Dear Colleagues,

This special issue aims to publish contributions pertaining to psychological consequences of the COVID-19 pandemic. We will be looking for investigations characterizing the impact of COVID-19 related restrictions on human behavior, with a particular focus on social and emotional processes. Topics of interest include: descriptions of social and emotional consequences of the pandemic; impact of the pandemic on addictive behavior, including addiction or gambling; identification of mitigating/aggravating predictors of social and emotional variables. Considering the potential relevance of media and technology in a context where individuals are socially isolated, we also invite submissions addressing (but not limited to) the influence of broadcasting of pandemic-related news on the adoption of protective behavior and mental health variables, the dissemination of fake-news related to COVID-19 and their potential impact on mental health, the use of digital technology (e.g., social-media, online gaming) and their association with mental health variables.

Keywords:

COVID-19; Emotion; Mental Health; Communication;
Addiction; Gambling; Media Psychology

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
