Message from the Guest Editors

Dear Colleagues,

This Special Issue collects original research and critical reviews about scientific and technical information on the recent advances in green technologies for achieving sustainable environment. The primary areas of interest include the design criteria, technology hybridization, and adaptation to climate change.

Asst. Prof. Shu-Yuan Pan

Assoc. Prof. Li-Chi Chiang

Prof. Yu-Pin Lin

Guest Editors

Keywords

- new agriculture
- circular economy
- nonpoint source pollution control
- best management practices
- non-conventional water reuse
- ecosystem services
- resilient city and flood management
- food, water, energy, and land nexus
- adaptation to climate change

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
