Environments, University of
South Australia, 101 Currie St,
Adelaide, SA 5001, Australia

Message from the Guest Editors

The aim of this Special Issue is to explore the latest research in technological innovation across the health-promotion spectrum. It will provide an overview of how technological disruptors have revolutionized health promotion over time, identify barriers and enablers for existing technology-delivered health-promotion programs, identify the next wave of technological innovation for health promotion, and provide a scaffold for future health promotion programs that intend to use technology-supported mechanisms for delivery and evaluation.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
