Department of Nursing, College  
of Medicine, Wonkwang  
University, Iksan 54538, South  
Korea

Deadline for manuscript  
submissions:

**closed (31 October 2021)**

### Message from the Guest Editors

Cardiovascular diseases are the most common noncommunicable diseases globally. Even though the incidence of cardiovascular diseases is stable, the prevalence has been increasing because of the aging population and improvements in treatment. This will cause further increases in hospitalization rates, poor quality of life and, consequently, in health care costs.

The *International Journal of Environmental Research and Public Health* will dedicate a Special Issue of the journal to “Healthcare and Cardiovascular Diseases”. This Special Issue of the open access and peer-reviewed journal covers the broad field of cardiovascular health and care, including chronic and acute care, cardiac rehabilitation, primary and secondary prevention, heart failure, acute coronary syndromes, interventional cardiology, cardiac care, and vascular care.

Our Special Issue will help to disseminate new research in the health and healthcare field to inform the work of health professionals. We invite submissions that report research using all research designs. We welcome reviews and studies that have the potential to change clinical care settings and health policy as well as public health areas.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Paul B. Tchounwou**

University, 1700 E. Cold Spring  
Lane, Baltimore, MD 21251, USA

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
