Message from the Guest Editors

Dear Colleagues,

Certification, quality and safety of the agri-food products, characterize what consumers seek and require from producers. Therefore, ensuring agri-food safety and quality is a public health priority, and an essential step for achieving food security. Since the use of an interdisciplinary approach is essential, this Special Issue (SI) requires documents which demonstrate the important role that the integrated and multidisciplinary perspective can play in relation to food safety problems with a vision of Food Hygiene, Public Health, Environmental Sciences, Food Chemistry, Economics, and/or others themes. The aim of this SI is to collect innovative papers deriving from different and complementary expertises concerning “AgriFood Safety and Quality”. We invite researchers to contribute both with original research articles, as well as reviews focused on safeguarding agri-food safety and quality. The research interest should concern principally prevention of human health risks by improving nutraceutical characteristics through the application of innovative analytic methods as metabolomics and use of genotoxic and mutagenic biomarkers.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
