### Message from the Guest Editor

Dear Colleagues,

Telemedicine and eHealth reflect the changes in modern medicine in the form of digital transformation. Transformational changes are entering fields with over 100 years of tradition in analyzing and transmitting medical signals. Digitization in the treatment areas has shorter practices. Literature reviews on digitization, including orthopedics, orthopedic trauma, spine surgery, and other fields dealing with injuries, disorders, and health of the musculoskeletal system, date back to 1993. An example would be the number of publications available in the PubMed database on telemedicine and orthopedics. In 2019, the number of publications increased from single publications in the early 1990s to 65.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
