Prof. Dr. Katsunori Ikari

Department of Orthopedic Surgery, Division of Multidisciplinary Management of Rheumatic Diseases, Tokyo Women's Medical University, 8-1 Kawada, Shinjuku, 162-8666 Tokyo, Japan

Message from the Guest Editors

We are organizing a Special Issue on the impact of joint-preserving surgeries for rheumatoid forefoot deformities in the *International Journal of Environmental Research and Public Health*. There are many procedures to preserve joints, including various types of osteotomy and soft tissue reconstruction. This Special Issue aims to provide detailed surgical techniques and the outcomes of each procedure. We hope that surgeons can choose the optimum surgical methods from this Special Issue to achieve the best practice and restore foot health.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
