Deadline for manuscript  
submissions:

**closed (30 April 2022)**

### **Message from the Guest Editors**

A vast body of research has shown that the health of a population is determined to a lesser extent by individual lifestyles and biology, but more profoundly by historical and socially determined conditions such as the socioeconomic position and social relationships among individuals and across neighborhoods. The study of social conditions and how these conditions influence and determine the health of populations is a subject of interest and importance for public health in general.

For this Special Issue, we invite the submission of papers that describe interventions that are being conceptualized, developed, implemented, and/or evaluated that intervene through one or more social determinants (e.g., racism, socioeconomic conditions, social capital, gender inequality, racial capitalism, religious discrimination, and intergenerational trauma) in one or more population groups. We are particularly interested in papers that intervene across levels including neighborhood or societal, and/or across multiple systems including government/political or cultural (e.g., the church, schools, health departments).

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
