Patient-Based Dentistry: Personalized Therapy and Prevention

Guest Editors:

Prof. Dr. Gianna Maria Nardi
Department of Dental and Maxillofacial Sciences, "Sapienza" University of Rome, 00161 Rome, Italy

Prof. Dr. Roberto Felice Grassi
Department of Medical Basic Sciences, Faculty of Medicine and Surgery, Neuroscience & Sense Organs, University of Bari- "Aldo Moro" Bari, Italy

Deadline for manuscript submissions:
closed (31 December 2022)

Message from the Guest Editors

Some of the best advancements in medicine include artificial intelligence, data analysis and its management, molecular diagnostics, human genome sequencing, oral microbiome, and biology systems. These innovations are mainly aimed at developing a new breed of clinical methodologies towards treatment improvements while minimizing adverse events. Through these improvements, we can also enhance targeted therapies in oral hygiene and medicine. Customizable and individual procedures in oral hygiene are intended for the prevention and treatment of gingivitis, periodontitis, and peri-implantitis with a patient-based approach. Personalized oral hygiene is an approach to both preventive care and therapeutic strategy, and the role of dental hygienists and dentists in this clinical and research scenario plays a central role, making them the sentinel of oral health status as they can observe the health and disease of the oral cavity, with particular attention to mineralized and soft tissues, making sure to identify the risk factors for the health of the oral cavity, deriving from incorrect lifestyles and systemic diseases.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
