Message from the Guest Editors

Dear Colleagues,

Prostate cancer is one of the most common malignant in men. Most frequently prostate cancer is diagnosed as a localized disease and several treatments are available, including surgery, active surveillance and radiotherapy. However, all these treatments might have an impact on sexual and reproductive male health. The aim of this special issue is to investigate the relationship between prostate cancer diagnosis, not only in a localized stage, and male reproductive and sexual wellbeing. In particular we would like to focus our attention on the effect of both diagnosis and treatment on this important aspect of male patients life.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
