Research Program, University of  
California, USA

### **Message from the Guest Editors**

Dear Colleagues,

This Special Issue reports the results of consensus building among experts and stakeholders recruited to participate in a series of meetings with the purpose of defining what the state of the science is in three overarching areas: environmental exposures, health disparities, and population level prevention interventions. National experts participated in meetings, calls, and literature evaluation to identify priorities for the next steps in each of these areas.

Prof. Dr. Marion Kavanaugh-Lynch

Prof. Dr. Deborah J. Bowen

Dr. Nicholas Anthis

University, 1700 E. Cold Spring  
Lane, Baltimore, MD 21251, USA

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
