

Sustainability and Resilience in Health: The Role of Performance Management

Guest Editors:

Dr. Milena Vainieri

Dr. Laura Rosella

Dr. Guido Noto

Dr. Francesca Ferré

Deadline for manuscript
submissions:
closed (30 June 2022)

Message from the Guest Editors

This Special Issue of the *International Journal of Environmental Research and Public Health (IJERPH)* seeks to advance our understanding of managerial strategies, governance mechanisms, as well as performance management systems that can be applied to cope with different scenarios.

Specific themes include (but are not limited to) the following:

- How performance measurement systems evolve, or should evolve, to support decision-makers in dealing with the emergent challenges. What are the implications for information systems?
- How does the organization and management of different health systems capture the health and social needs of populations?
- What could be the factors that help to build resilience, making it easier for health systems to respond effectively to future challenges?
- How can embracing the multifaceted elements of value in performance management lead to a sustainable health system?
- What are the intended or unintended consequences of the different strategies health systems and organizations implemented for the evolving scenarios?

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
