submissions:

**closed (31 July 2023)**

### Message from the Guest Editors

Dear Colleagues,

Technology is changing the daily lifestyles of urban residents and reshaping the relationship between urban residents and urban spaces. Particularly, in the coming years, urban spaces are anticipated to offer both physical and mental health benefits via design, reconstruction, and greening. Urban spaces will become places where people can conduct physical activities and/or social activities, as well as rest or relax to promote physical and/or mental health. The building of sustainable urban spaces is directly linked with the construction of sustainable cities and communities, one of the UN's Sustainable Development Goals (SDGs). The sustainable management and planning of urban spaces is expected to contribute to health promotion, resilience enhancement, and sustainable transport development. Therefore, this Special Issue welcomes papers focused on the development of sustainable urban spaces.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
