Telemedicine in the Era of COVID-19

Guest Editor:

Dr. Giulio Nittari
Telemedicine and Telepharmacy Center, School of Medicinal and Health Products Sciences, University of Camerino, 62032 Camerino, Italy

Deadline for manuscript submissions:
closed (31 March 2022)

Message from the Guest Editor

Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), the virus causing the deadly coronavirus disease 2019 (COVID-19), is a member of a large family of viruses—coronaviruses—that cause various diseases of the pulmonary system ranging from the common cold to severe respiratory syndromes such as the Middle East respiratory syndrome (MERS) and severe acute respiratory syndrome (SARS). COVID-19 afflicts all age groups; in particular, 95% of deaths have occurred in people over the age of 60. In preventing this COVID-19 deadly pandemic, telemedicine can help by enabling mildly ill patients to receive the supportive care they need while minimizing their exposure to other seriously ill patients. Hence, in promoting telemedicine during the COVID-19 era, it is important to reduce the spread of viruses and support public health measures. In this Special Issue, the management of patients with COVID-19 and how to reduce the infection rate using telemedicine technology are discussed. Therefore, an evidence-based prevention strategy is essential to reduce mortality and morbidity due to the COVID-19 pandemic, particularly through the use of telemedicine technologies.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
