### Message from the Guest Editors

Intimate partner violence (IPV) is an under-recognized epidemic and global public health crisis. The physical and mental health burden on those that experience IPV is devastating and long-lasting. According to the World Health Organization (WHO), 35% of women experience physical and/or sexual IPV in their lifetimes. Innovative, effective interventions are critically needed to help individuals, families, and communities to heal and thrive. However, despite policy initiatives and criminal justice responses, rates of IPV have remained relatively stable. To date, approaches to address IPV in healthcare and social settings are promising, yet there remains a paucity of IPV interventions.

In this Special Issue, we plan to bring together global interdisciplinary research that provides innovative solutions to address IPV within healthcare and social contexts. We welcome efficacy or effectiveness research articles focused on violence-involved individuals (i.e., those that use or experience violence) as well as systematic reviews or meta-analyses. In addition to individual-level interventions, we also welcome relational and multi-level intervention studies.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
