Message from the Guest Editors

Adolescence is the phase of life stretching between childhood and adulthood. Many adolescents engage in health-risk behaviors. These risk behaviors are established during childhood and adolescence and extend into adulthood. The most important public health interventions are informing or educating the target population about risks, persuading them to reduce those risks, encouraging them to adopt healthy or safe behaviors, and modifying the environment to reduce exposure to risks or to promote or facilitate safe or healthy behaviors.

The aim of this Special Issue is to identify persons at risk and target the attention of researchers, teachers, policy makers, and the general public on these issues. We welcome papers that address adolescent and young people's health from different perspectives and research fields, such as Public health, Clinical medicine, Psychology, Sociology, etc. Multidisciplinary papers are also welcome, as are papers which bring novel approaches to public health interventions. We are looking forward to receiving your contribution and creating a Special Issue that will provide readers with new information on adolescents' and young people's health.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
