Message from the Guest Editor

We are seeking to ensure that we develop a better understanding of the issues that create barriers to the adoption of digital technologies, not only from the healthcare professionals' and patients' perspective but also that of policy makers and commissioners of services. It is important that we do not disable the contribution that digital technologies can make in the global recovery from COVID-19. We are thus inviting academics to share their current work on the enablers and barriers to adoption and in particular are seeking contributions that focus on trust. Papers on the lessons learned in relation to the use of digital tools and services in the management of the COVID-19 pandemic and on COVID-19 recovery are encouraged. This can also include research into explainable and trustworthy AI, but all trust aspects of digital service adoption and scaling across all aspects of health and care delivery will be welcomed. By exploring how trust can be gained and communicated as well as lost, we can better understand how it is built into the innovation process from the early stages of product and service development.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and many other databases.

Journal Rank: JCR - Q1 (*Public, Environmental & Occupational Health*) / CiteScore - Q2 (*Public Health, Environmental and Occupational Health*)
