### **Message from the Guest Editor**

Dear Colleagues,

Breastfeeding is a key public health strategy to improve the health of mothers and their infants. It is the best source of nutrition for most infants and reduces the risk for some short- and long-term health conditions for both infants and mothers. Clinicians, public health advisors, nutritionists, and others have been attempting to increase breastfeeding rates for the last few decades, with varying degrees of success. We need social science researchers to help us understand the role of infant feeding in the family.

While breastfeeding rates are increasing in all racial/ethnic populations, disparities in breastfeeding continue, with the lowest rates of breastfeeding being reported among African American and Native American mothers/infants. Low rates of breastfeeding add more than \$3 billion a year to medical costs for women and children in the United States. Actions are needed with a focus on health equity and decreasing disparities in breastfeeding, primarily among African American and Native American families.

This Special Issue will present original articles, systematic reviews, meta-analysis, and case reports on breastfeeding.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
