Dental Sciences and
Morphofunctional Imaging,
Section of Orthodontics,
University Polyclinic Hospital “G.
Martino”, 98125 Messina, Italy

Deadline for manuscript
submissions:

closed (30 March 2022)

Message from the Guest Editor

We are concerned not only with the sick patient but also with the healthy individual—the latter meaning not only as a single “system” to be strengthened, but also as an active member of a community that participates and continually redefines its level of health, making active and conscious choices in support of wellbeing. Therefore, for dentists too, health promotion is an important methodological tool of reference, identifying creative strategies and interventions for the realization of an oral health project to be developed in their own professional context, be it private or public, individually or as a team. Researchers’ goal is to provide original contributions that describe or validate the most innovative strategies for the prevention and promotion of oral health in children. In order to achieve this goal, clinicians, researchers, and experts in various fields of pediatric dentistry are invited to submit original papers or reviews of scientific literature to this emergent issue.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
