Message from the Guest Editors

Quality of care at the end of life is necessary. According to the World Health Organization, the number of people over the age of 60 in the world population will almost double by 2050. Although palliative care has been developed and implemented in many countries, most studies suggest that health professionals are poorly prepared for end-of-life care and do not feel capable of managing patients who need this care. Thus, there is a need for in-depth investigations to determine possible gaps in the knowledge, communication, assistance, and therapies in palliative care.

This Special Issue of the *International Journal of Environmental Research and Public Health* (IJERPH) focuses on the current state of knowledge in palliative care at the end of life and the relationship between quality of care and well-being of patients, their families, and public health.

We will accept manuscripts from different disciplines including ethics, education, healthcare impact, pharmacology, pain management, intervention and evaluation, cancer, palliative care, etc.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
