Sydney School of Public Health, The University of Sydney, Sydney, NSW 2006. Australia

Deadline for manuscript submissions:

closed (31 August 2022)

Message from the Guest Editor

This Special Issue accept submissions that examine the use of social protection strategy/intervention in combating maternal and child undernutrition. Examples of research questions could include (but not limited to):

What are the relative impacts and cost-effectiveness of different social protection programs in improving maternal and child undernutrition?

How cost-effective are CCT programs compared with other demand side interventions to improve maternal and child nutrition?

What is the role of social protection in reducing inequalities in maternal and child nutrition outcome?

What are the long-term effects of social protection programs on nutrition behaviour change, and how sustainable have they been?

What are the pathways through which social protection programs affect maternal and child undernutrition, and what are the implications for program design?

What is the evidence of the effectiveness of cash transfers in improving undernutrition?

What role social protection can play in the fight against food insecurity and malnutrition?

How do nutrition-sensitive social protection programs affect intergenerations and gender relationships at the community and house all explanations and sensitive social protection programs

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
