Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editors

Today, in the digital era, numerous coordinated actions have already been taken on national and international levels to ensure access to, the visualization of, and the possibly of the download of publicly available digital data. In particular, experts state that geospatial information, which is very often in the charge of public authorities, is of high importance when it comes to exchange between the public and private sectors.

In this context, BIM and GIS integration has a crucial role. Building information modeling (BIM) and geographic information systems (GIS) are now used in a variety of applications. Although based on different technologies and developed for addressing different practical problems, the acronyms share a common “i” (information) and a common purpose: the better access, use, and understanding of digital information. However, several technical and practical issues need to be considered. This Special Issue aims at collecting both theoretical and application-oriented manuscripts dealing with the integrated use of BIM and GIS.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [GeoRef](#), [PubAg](#), [dblp](#), [Astrophysics Data System](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Geography, Physical*) / CiteScore - Q1 (*Geography, Planning and Development*)
