Allergy Research Group, Instituto
de Investigación Biomédica de
Málaga (IBIMA), Hospital Regional
Universitario de Málaga, Málaga,
Spain

Deadline for manuscript
submissions:

closed (15 May 2023)

Message from the Guest Editors

Dear Colleagues,

Allergic diseases and asthma are common, complex, heterogeneous diseases with a wide spectrum of clinical symptoms, essentially due to their multifactorial nature. However, despite the multiple advances on allergen characterization and molecular and cellular bases that underlie these diseases, there are many essential aspects that should be improved at different levels.

Advances in molecular and cellular biology and genetic engineering, driven by new techniques of massive studies at the genomic, proteomic, transcriptomic, epigenomic, metabolomic, etc. levels aided by complex computer analysis systems are allowing the study of this type of diseases to be approached from other perspectives, providing new key tools that could drive new molecular medicine in the future.

In this Special Issue, we invite original articles or reviews that address allergic diseases and asthma, preferably from a molecular perspective, providing new knowledge on diagnostic, prevention, or novelty treatments supported by future molecular medicine applicable to these complex diseases.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
