Deadline for manuscript  
submissions:

**closed (25 April 2024)**

### **Message from the Guest Editor**

Dear Colleagues,

Oral potentially malignant disorders are mucosal diseases with different aetiologies. The risk of malignant transformation varies among these lesions and has been correlated with oral epithelial dysplasia. However, epithelial dysplasia lesions can last long without undergoing malignant transformation and even regress spontaneously. The underlying molecular changes related to oral cancer transformation are poorly understood. In this Special Issue, we will present works that clarify the molecular pathogenesis associated with potentially malignant oral disorders' transformation into oral cancer. Articles addressing predictive molecular markers or future perspectives of molecular tools for oral cancer prevention are also encouraged.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
