### Message from the Guest Editor

This open-access Special Issue will bring together original research and review articles on molecular oncology with attention to endometrial cancer. It highlights new findings, methods, and technical advances in molecular cancer research. The main feature of this Special Issue is to provide an open-source sharing of significant works in the field of molecular oncology that can increase our understanding of endometrial cancer development, which may lead to the discovery of new molecular diagnostic technologies and targeted therapeutics.

Topics include but are not limited to:

Molecular methods to personalize endometrial cancer screening and detection;

Identification and new aspects of cellular signaling molecules and pathways for target discovery, drug design, personalized and gender medicine;

DDI discovery in endometrial cancer management;

Drug repurposing for endometrial cancer prevention/treatment;

Molecular modeling studies.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
