Deadline for manuscript
submissions:

closed (30 June 2022)

Message from the Guest Editor

Low-intensity exposures are the most unexplored field of modern molecular toxicology. A lack of knowledge on the mechanisms of low-intensive factors causes problems in (a) the prediction of biological effects, (b) overcoming negative consequences, and (c) application of positive results. Therefore, the analysis of low impacts is topical from both fundamental and applied standpoints, particularly for ecology, biology, and medicine.

Modern toxicology uses three dose–response models: linear, threshold, and hormesis. The latter implies an activation of physiological functions at low-dose exposures and their inhibition at higher doses and describes these effects in terms of ‘adaptive response’ and ‘toxicity’, respectively. It is supposed that the hormesis model can be applied as a basic one, transforming to the other models under definite restrictions.

Studies of biological responses to bioactive compounds, radiation of different types, etc. under the conditions of low-intensity exposures are encouraged. A chemical and biochemical basis for these responses is of interest.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
