Deadline for manuscript
submissions:

closed (28 April 2022)

Message from the Guest Editors

Cerebrovascular diseases are a heterogeneous group of disorders that affect brain vasculature structure and cerebral blood flow regulation. The common pathological event related to cerebrovascular diseases is stroke, manifested as a sudden cessation of blood flow due to vessel occlusion (ischemic stroke), transient occlusion with recovery (transient ischemic attack), or vessel rupture (hemorrhagic stroke). Brain endothelial cell dysfunction, vessel wall deterioration, and perivascular environment remodeling are major pathological substrates in cerebrovascular diseases. This Special Issue is focused on the molecular mechanisms of endothelial dysfunction and perivascular environment remodeling that lead to lodging of thromboemboli, vessel occlusion and rupture, the mechanism of aging and metabolic vascular wall degeneration, vascular injury and remodeling in sporadic and inherited vascular malformations, and mechanisms of impaired cerebral autoregulation. We welcome submissions of original research and review articles related to any aspect of the molecular mechanisms and pathogenesis of cerebrovascular diseases, identification and exploration of novel targets, and biomarkers.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
