Deadline for manuscript submissions:

closed (30 September 2022)

Message from the Guest Editor

Dear Colleagues,

Chlamydia trachomatis, responsible for genital infection, trachoma, and lymphogranuloma venereum according to the specific serotype, is still a relevant public health problem worldwide due to the high prevalence of asymptomatic infections in both women and men, favoring the onset of chronic complications, such as pelvic inflammatory disease and ectopic pregnancy for women, epididymitis and proctitis for men, as well as reactive arthritis and infertility for both sexes. These are likely due to the long-term persistence of *C. trachomatis* infection in the host organism, leading to a chronic inflammatory state and the consequent tissue damage.

To date, many critical questions on the pathogenesis of *C. trachomatis* infection remain to be answered. For example, the nature of the host innate immune response to *C. trachomatis*, as well as the virulence factors involved.

In order to shed light on the etiopathogenesis and host cell response mechanisms of damaging *C. trachomatis* infection, this Special Issue is dedicated to current progress in chlamydial infection pathogenesis and related diseases.

Prof. Dr. Rosa Sessa

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
