Deadline for manuscript  
submissions:

**closed (30 November 2023)**

### Message from the Guest Editor

Dear Colleagues,

According to the World Health Organization, cancer is a leading cause of death worldwide, having accounted for nearly 10 million deaths in 2020. With the rapidly growing number of cancer patients, less harmful and less toxic therapies have been recently introduced. Thus, research regarding this topic has been exceedingly active.

Significantly, nutrition and nutrition-based products have been sought to be utilized as less damaging cancer therapies. That said, it is noteworthy that various natural products have shown positive effects as anticancer agents; in addition, several anticancer therapeutics are derived from natural sources. Therefore, enormous efforts have been made to discover new cancer drugs from natural products.

This Special Issue aims to highlight the current situation regarding the use of natural-product-related medicines for cancer treatments, therapies. Importantly, the exact active ingredient of a natural product extract must be reported in the submitted research manuscript, as papers that describe the effects of mixed extraction from natural products will not be accepted.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
