

## Legume Genetics and Biology: From Mendel's Pea to Legume Genomics

### Guest Editors:

**Prof. Dr. Petr Smýkal**

Department of Botany, Palacký  
University, 771 47 Olomouc,  
Czech Republic

**Dr. Eric J. Bishop von  
Wettberg**

Department of Plant and Soil  
Science and Gund Institute for  
the Environment, University of  
Vermont, Burlington, VT 05405,  
USA

**Prof. Dr. Kevin McPhee**

Plant Sciences and Plant  
Pathology Department, Montana  
State University, Bozeman, MT,  
USA

Deadline for manuscript  
submissions:

**closed (31 January 2020)**

### Message from the Guest Editors

The Fabaceae is the third largest family of flowering plants, with over 800 genera and 20,000 species. It is an extremely diverse family of worldwide distribution, from arctic alpine herbs, to annual xerophytes and forest trees. Legumes have played an important part in cropping systems since the dawn of agriculture. Their ability to symbiotically fix nitrogen and improve soil fertility has been rewarded since antiquity. Legumes have always been a part of everyday life, as human food and animal feed, being key protein sources. Peas have been extensively used in early hybridization studies, and they were the model organism of choice for Mendel's discovery of the laws of inheritance, making peas part of the foundation of modern genetics. Now, certain legume crops have well-studied genetic systems, while in many of these, comprehensive genetic analysis is limited due to the large size of their genomes. This Special Issue addresses/aims to provide up-to-date information on legume biology, genetic advances, and the legacy of Mendel.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maurizio Battino

Department of  
Odontostomatologic and  
Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of  
Medicine, Università Politecnica  
delle Marche, Via Ranieri 65,

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
