Pluripotent Stem Cells 2021

Guest Editor:

Dr. Hyuk-Jin Cha

College of Pharmacy, Seoul National University, Seoul 08826, Korea

Deadline for manuscript submissions:

closed (31 December 2021)

Message from the Guest Editor

Thanks to the recent advances in stem cell research, there are emerging applications of pluripotent stem cells. As pluripotency, a unique feature of pluripotent stem cells, enables the production of all types of cells in the human body, a variety of cell types derived from pluripotent stem cells would be a promising cell source, not only for regenerative medicine, but also in the basic sciences for disease mechanisms and development. Besides, the substantial advancement in gene-editing technology even extends the application of pluripotent stem cells to enable "human disease modelling" and "ex vivo cell therapy" for genetic diseases. This Special Issue of the International Journal of Molecular Sciences covers the research interest in basic sciences of pluripotency, self-renewal, lineage differentiation, cellular reprogramming, and a wide range of applications of pluripotent stem cells to extend the future applications of pluripotent stem cells in a variety of scientific fields

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
