### Message from the Guest Editors

In the Special Issue, we would like to publish original skin cancers research, which affected or may affect on the other cancer types in the future. The basic, translational, therapeutic and combination approaches are recommended. Review papers summarizing earlier discoveries such as molecular targets for diagnosis and/or treatment of melanoma and cutaneous carcinomas, which are used in other cancers, immunotargets and immunotherapy such as cancer vaccines, immune check-points inhibitors, cancer stem cells, including further perspectives for developments. Meta-analyzes of big-data generally available (such as The Cancer Genome Atlas) for further validation in experimental settings are also welcome.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
