Role of Stem Cells in Ophthalmology

Guest Editor:

Dr. Biju B. Thomas

USC Roski Eye Institute, University of Southern California Keck School of Medicine, Los Angeles, CA 90033, USA

Deadline for manuscript submissions: closed (31 January 2022)

Message from the Guest Editor

The retina, which consists of the multi-layered neural retina and the mono-layered retinal pigment epithelium (RPE), has limited capacity for regeneration. Common retinal diseases such as age-related macular degeneration (AMD), retinitis pigmentosa (RP), glaucoma, and diabetic retinopathy cause irreversible vision loss. To restore vision, stem cell therapy is particularly attractive because of its potential to replace degenerated or damaged retinal tissue. Recent studies have used embryonic stem cells (hESCs) or induced pluripotent stem cells (iPSCs) as sources for transplantable tissue. We warmly welcome submissions, including original papers and reviews on various cellular therapies for the molecular mechanisms and treatment of retinal dysfunction diseases. This Special Issue focuses on basic research in the growth and differentiation of stem cells into various retinal cell types, targeting of molecular pathways, advanced labelling techniques, use of biomaterals, 3D bioprinting, retinal organoids, and gene editing to induce stem cell differentiation as emerging techniques.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
