Message from the Guest Editors

Dear Colleagues,

Invasive arthropod pests are a major threat to food production and environmental sustainability globally. The purpose of this issue is to invite authors to present proactive and innovative approaches to confronting invasive arthropod pests. We need to establish global scientific expertise to enable methods development and integration of efforts in order to mitigate the negative impacts associated with an increasing number of invasions.

This Special Issue will address pests that impact major commodities, specialty crops, and natural landscapes. The primary purpose of this initiative is to create a forum to enhance the discussion of integrated, strategic, and front-line approaches to key invasive arthropod pests.

Prof. Jose Carlos Verle Rodrigues
