

Innovative Strategy of Protection and Control for the Grid

Guest Editors:

Prof. Dr. Bhaveshkumar R. Bhalja

Department of Electrical Engineering, Indian Institute of Technology, Roorkee 247667, India

Prof. Dr. Om P. Malik

Department of Electrical & Computer Engineering, University of Calgary, 2500 University Dr. NW, Calgary, AB T2N 1N4, Canada

Deadline for manuscript submissions:

31 July 2024

Message from the Guest Editors

The focus of this Special Issue is on the development of a coordinated protection and control scheme for the system, which reduces risk and improves grid resiliency. The post fault stability concerns will be a part of the decision-making process while addressing the protection issues, and hence, disastrous consequences can be avoided with minimum time delays. Moreover, this Special Issue also focuses on the seamless integration of energy storage with an existing grid with considerable penetration of renewable energy resources, leading to its universal deployment. As the deployment of battery storage, PV and wind generation is rapidly increasing, their optimal allocation would certainly improve grid resiliency during extreme events. Therefore, a new multi-objective optimization approach will be required to decide the optimal sizing and location of battery storage, PV, and wind generation for improved system resilience.

Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (General Engineering)
