Message from the Guest Editors

The Special Issue concerns engineering science, medical physics technologies involving cardiovascular and respiratory diseases. With the burden of chronic disease increasing, clinical practitioners and researchers' need to generate new and innovative technologies is intensifying. This Special Issue brings together multi-disciplinary contributions and innovations to improve the diagnosis, treatment and long-term health care of patients facing cardiovascular and respiratory diseases.

Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.
Journal Rank: CiteScore - Q1 (*General Engineering*)
