Message from the Guest Editor

Dear Colleagues,

The temporomandibular joint (TMJ) can be remodelled even after growth has stopped, allowing it to undergo structural changes and adapt to different physiological demands.

Temporomandibular disorders (TMDs) are a group of degenerative disorders involving the components of the TMJ, and can lead to displacement of the disc, joint remodelling, and eventually, osteoarthritis.

Different methods of diagnosing and treating TMDs have been described in the literature.

The aim of this Special Issue is to update the information on methods of TMD diagnosis, from clinical exams to immunohistologic and molecular diagnosis, and on novel treatments for this disease; these include non-invasive techniques such as physical therapy, ultrasound, low-level laser therapy, and splints; minimally invasive techniques such as corticosteroid injections, arthrocentesis of the joint (with or without platelet-rich plasma or hyaluronic acid injections), and arthroscopic surgery; and invasive procedures for advanced stages of TMDs, which include discectomy, disc replacement, and total joint replacement.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
