Message from the Guest Editor

Dear Colleagues,

The area of type 2 diabetes is rapidly changing due to recent treatment approaches with pleiotropic effects, which also target several diabetes complications (cardiovascular, renal, retinal, etc.) and the incorporation of “non-classical” complications such as diabetic livers, diabetic lungs, cognitive impairment, etc.

This Special Issue welcomes articles either highlighting recent developments in or providing new experimental (in vitro or animal model) or clinical (human) data related to pathogenesis of Type 2 diabetes and its complications. We would appreciate it if the authors provided a brief section in their manuscript indicating the novelty of their findings or, in the case of review articles, provided personal views on a particular topic.

In summary, I am happy to host this Special Issue and welcome solicited and unsolicited submissions that will contribute to its success.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
