Message from the Guest Editor

The subjects of interest for this Special Issue encompass lifestyle measures, medical therapy, and follow-up for managing cystine stone recurrences, the role of biomarkers in the diagnosis and monitoring of urothelial carcinoma, and optimal medical management strategies for recurrent urinary stone formers. The Special Issue is expected to provide valuable insights into the diagnosis and treatment in these two specific urinary disorders, which will be of significant interest to urologists, nephrologists, and other healthcare professionals involved in the care of patients with urinary tract disorders. The latest developments and advancements in this Special Issue will help to enhance the quality of care, treatment, and long-term outcomes of patients with urinary system disorders.
